LAWN SPRINKLER WAIVER

According to the drawings submitted, a lawn sprinkling system is planned to be installed on your premises. The plans also show the sprinkler lines are to be extended into the City right-of-way, installed in the parkway.

This is City property; sometime in the future, the City may find it necessary to excavate the parkway or maintain the street where your lawn sprinkler is located. Because this is City property, the City cannot be held liable for the replacement of any part of the sprinkling system installed in the City right-of-way.

You, as the owner, are requested to sign this letter to indemnify the City for possible future damage to your sprinkler system that is installed within the City right-of-way.
